Betadine - Wound Care

Betadine is a topical solution used to reduce bacteria on the skin. It's commonly used before surgical procedures and to treat minor cuts, wounds and skin infections. Betadine contains iodine, which gives it the yellowish-brown color that's clearly visible on the skin. Whether you've ...

How to Remove Betadine From the Skin | Our Everyday Life

Chemistry. Free iodine, slowly liberated from the povidone-iodine (PVP-I) complex in solution, kills eukaryotic or prokaryotic cells through iodination of lipids and oxidation of cytoplasmic and membrane compounds. This agent exhibits a broad range of microbicidal activity against bacteria, fungi, protozoa, and viruses.

Povidone-iodine - Wikipedia

A scrub is a betadine shampoo--you have to scrub it on and rinse it off because there is soap in it. A solution can just be applied. I go for the shampoo because the only times I have ever used it is to treat fungus, where I want to scrub it in to remove the fungus and then rinse away and then apply an anti fungal ointment.

What is the difference between Betadine Scrub and Betadine ...
