Nutrition supplements come in a variety of forms. They are called supplements because their role is to add certain nutrients to your regular diet. Dialysis patients often benefit from supplements due to the nature of their treatment and particular nutrition needs. Physicians and registered dietitians often prescribe or recommend supplements that will benefit an individual patient.

You may need to make changes to your diet when you have chronic kidney disease (CKD). These changes may include limiting fluids, eating a low-protein diet, limiting salt, potassium, phosphorous, and other electrolytes, and getting enough calories if you are losing weight.. You may need to alter your diet more if your kidney disease gets worse, or if you need dialysis.

### **Diet - chronic kidney disease: MedlinePlus Medical ...**

In essence, renal dialysis is a way to artificially replicate some of the necessary functions of the kidneys. For patients with chronic kidney failure, dialysis is the only way to filter out toxins that would otherwise impact the body and eventually cause death.

I. CLINICAL PRACTICE GUIDELINES FOR VASCULAR ACCESS GUIDELINE 1. PATIENT PREPARATION FOR PERMANENT HEMODIALYSIS ACCESS. Appropriate planning allows for the initiation of dialysis therapy at the appropriate time with a permanent access in place at the start of dialysis therapy.

### **NKF KDOQI Guidelines - CacheFly**

Peritoneal dialysis was first used for the management of end-stage renal disease in 1959. [] In 1968, Henry Tenckhoff developed the indwelling peritoneal catheter, which was placed via an open surgical technique. [] Subsequently, percutaneous and laparoscopic techniques for placement have been utilized.
