The engine is not the problem, the FUEL is. The US has been slow in adopting the ULSD clean fuel widely available in Europe and Japan. As a result, diesel car manufacturers were left with the impossible task of meeting US emission rules with a fuel that is 10 times more polluting (and costs more to boot).

One of the central objectives of green economic transformation is to move extractive industry from the country to the city. Virgin materials are no longer appropriate sources for most of society's production. Talk of sustainable management of virgin resources will remain ideology or self-delusion without a radical transformation of society's infrastructure to cycle materials in relatively ...
