Humans vary substantially in their willingness to take risks. In a combined sample of over 1 million individuals, we conducted genome-wide association studies (GWAS) of general risk tolerance ...

Genome-wide association analyses of risk tolerance and ...

A monohybrid cross is a mating between two organisms with different variations at one genetic chromosome of interest. The character(s) being studied in a monohybrid cross are governed by two or multiple variations for a single locus. A cross between two parents possessing a pair of contrasting characters is known as monohybrid cross.

Famous people's Y-DNA listed by haplogroup. On 12 September 2012, archeologists from the University of Leicester announced that they had discovered what they believed were the remains of King Richard III of England (1452-1485) within the former Greyfriars Friary Church in the city of Leicester (see Exhumation of Richard III). The skeleton's DNA matched exactly the mitochondrial haplogroup ...

Many causes of autism have been proposed, but understanding of the theory of causation of autism and the other autism spectrum disorders (ASD) is incomplete. Research indicates that genetic factors predominate. The heritability of autism, however, is complex, and it is typically unclear which genes are responsible. In rare cases, autism is strongly associated with agents that cause birth defects.

La dominancia incompleta es la interacción genética en la cual los homocigotos son fenotípicamente diferentes a los heterocigotos. [1] Los cruzamientos que tienen una dominancia incompleta son aquellos en los que no existe rasgo dominante, ni recesivo. Suponiendo que la forma de los ojos estuviera determinada por un gen cuyo homocigoto dominante de forma grande y redonda y el homocigoto ...

Dominància. En genètica el terme al·lel dominant es refereix al membre d'un parell al·lèlic que es manifesta en un fenotip, tant si es troba en dosi doble, havent rebut una còpia de cada pare (combinació homozigòtica) com en dosi simple, en la qual un sol dels pares va aportar l'al·lel dominant en el seu gàmeta (heterozigosi).Els gens dominants són els que més predominen, com els ...
