

Gold Leaf Techniques

Gold Leaf Techniques

Gold leaf is gold that has been hammered into thin sheets by goldbeating and is often used for gilding. Gold leaf is available in a wide variety of karats and shades. The most commonly used gold is 22-karat yellow gold. Gold leaf is a type of metal leaf, but the term is rarely used when referring to gold leaf. The term metal leaf is normally used for thin sheets of metal of any color that do ...

Gold leaf - Wikipedia

How To Handle Gold Leaf. Imitation gold leaf is considerably thicker than 23 carat gold leaf, which is so thin it is semi transparent, this makes a great deal difference when it comes to handling the leaf.

How To Handle Gold Leaf - A Free Fully Illustrated Guide

Gilding is any decorative technique for applying a very thin coating of gold to solid surfaces such as metal (most common), wood, porcelain, or stone. A gilded object is also described as "gilt". Where metal is gilded, it was traditionally silver in the West, to make silver-gilt (or vermeil) objects, but gilt-bronze is commonly used in China, and also called ormolu if it is Western.

Gilding - Wikipedia

This beginners guide to gilding is meant to give a very basic overview of the gilding process for a beginner that is just starting off learning to gild. Before embarking on more elaborate gilding projects we would recommend that you read an informative book that is dedicated to the art of gilding, such as "Practical Gilding", which is available to purchase in our gilding books section.
