

Indoor Air Pollution Control

Indoor Air Pollution Control

Indoor air quality (IAQ) is the air quality within and around buildings and structures. IAQ is known to affect the health, comfort and well-being of building occupants. Poor indoor air quality has been linked to Sick Building Syndrome, reduced productivity and impaired learning in schools.. IAQ can be affected by gases (including carbon monoxide, radon, volatile organic compounds), particulates ...

Indoor air quality - Wikipedia

Air pollution occurs when harmful or excessive quantities of substances including gases, particles, and biological molecules are introduced into Earth's atmosphere. It may cause diseases, allergies and even death to humans; it may also cause harm to other living organisms such as animals and food crops, and may damage the natural or built environment. ...

Air pollution - Wikipedia

Causes of Indoor Air Pollution There are a variety of causes of poor indoor air quality. A NIOSH study based on over five hundred complaints found that inadequate ventilation and the release of contaminants from indoor and outdoor sources are the primary reasons for indoor air quality problems (see pie chart).
