An explanation of the purpose of diagnosis in clinical psychology. "Real" Psychological Diagnosis. Real psychological diagnosis, therefore, is not the naming of the disorder, it's the naming of the "Why" of the symptoms associated with the disorder. Real diagnosis emerges from within the treatment itself.

Diagnosis in Clinical Psychology

Greek Medicine is the traditional, indigenous holistic healing system of Western civilization. It was first codified and systematized by the Greek philosopher - physician Hippocrates in the 4th century B.C.E. and subsequently developed and expanded by other physicians, most notably Galen, Dioscorides and Avicenna.

DIAGNOSIS FROM THE STOOL The Alvine Discharge. In Greek Medicine, diagnosis can also be done by examining the stool, which is called the Alvine Discharge. Usually, general questions about the patient's stool and bowel habits are asked in the medical history, but when actual examination is needed, the physician will ask the patient to bring a stool sample in for inspection.

Iridology (also known as iridodiagnosis or iridiagnosis) is an alternative medicine technique whose proponents claim that patterns, colors, and other characteristics of the iris can be examined to determine information about a patient's systemic health. Practitioners match their observations to iris charts, which divide the iris into zones that correspond to specific parts of the human body.
