International Chemical Safety Card 1033; NIOSH Pocket Guide to Chemical Hazards; IARC Monograph: "Resorcinol" [dead link] IUPAC Nomenclature of Organic Chemistry (online version of the "Blue Book") This article incorporates text from a publication now in the public domain: Chisholm, Hugh, ed. (1911). "Resorcin" .

Resorcinol - Wikipedia

Resorcinol is a 1,3-isomer (or meta-isomer) of benzenediol with the formula C₆H₄(OH)₂. It is used as an antiseptic and disinfectant in topical pharmaceutical products in the treatment of skin disorders and infections such as acne, seborrheic dermatitis, eczema, psoriasis, corns, calluses, and warts.

James J. Licari, Dale W. Swanson, in Adhesives Technology for Electronic Applications (Second Edition), 2011. 3.1.1.4 Polyamides. Polyamide resins are characterized by the presence of the repeating amide group [-C(=O)-NH-] along the polymer chain. The polyamides are synthesized by the condensation polymerization of diamino compounds with dicarboxylic acids or esters.

Polyamide - an overview | ScienceDirect Topics

Aerogel is a synthetic porous ultralight material derived from a gel, in which the liquid component for the gel has been replaced with a gas. The result is a solid with extremely low density and low thermal conductivity. Nicknames include frozen smoke, solid smoke, solid air, solid cloud, blue smoke owing to its translucent nature and the way light scatters in the material.

Aerogel - Wikipedia

J.L. MASSINGILL JR., R.S. BAUER, in Applied Polymer Science: 21st Century, 2000. Applications of Epoxy Resins. Epoxy resins have found a broad range of application, mainly because the proper selection of resin, modifiers, and cross-linking agent allows the properties of the cured epoxy resin to be tailored to achieve specific performance characteristics.

A major objective of this review of disinfectant chemistry is the identification of likely by-products that might be formed through the use of specific disinfectants. The review is part of a comprehensive study of the possible health effects of contaminants in drinking water. The prediction of possible products, which is attempted herein, is intended to be a guide to those contaminants that ...

The Chemistry of Disinfectants in Water: Reactions and ...

There is intense interest in graphene in fields such as physics, chemistry, and materials science, among others. Interest in graphene's exceptional physical properties, chemical tunability, and potential for applications has generated thousands of publications and an accelerating pace of research, making review of such research timely.

Graphene and Graphene Oxide: Synthesis, Properties, and ...

Lycus Ltd. specializes in substituted benzophenone UV light absorbers with our MAXGARD® line for use in plastics, coatings, adhesives, polyester films, personal care product protection and cosmetics. These additives preserve against UV radiation.

Lycus Ltd., LLC - MAXGARD® UV Stabilizers :: Specializing ...

ADHESIVE or adhesives for Nylon, Kevlar and polyamide, RELTEK provides adhesives, sealants and coatings for nylon, kevlar, polyamide resin and dissimilar materials in harsh environments; Delrin, UHMW, polyethylene, polypropylene, Ultem, silicone, fluoropolymers and other difficult-to-bond materials.

ADHESIVES for Nylon

The Ordinary Vitamin C Suspension 23% + HA Spheres 2%. A water-free, silicone-free stable suspension

DECIEM | Skincare

Dr Qiao's research interests include synthesis and characterisation of nanomaterials as well as their applications in catalysis, energy storage and conversion (fuel cell, batteries, supercapacitor, electrocatalysis and photocatalysis)

The IHS Process Economics Program Chemical PEP Report emphasizes developments that have potential implications for the chemical and energy industries.

Chemical Process Economics Program PEP - Markit

ASTM adhesives standards are used internationally to evaluate adhesive performance-adhesion, strength, viscosity, fracture and other properties-- with industrial and construction materials such as wood, plastics, and metals.

Adhesive Standards - ASTM International

Malic acid is a tart-tasting organic dicarboxylic acid that plays a role in many sour or tart foods. In its ionised form it is malate, an intermediate of the TCA cycle along with fumarate. It can also be formed from pyruvate as one of the anaplerotic reactions.

Malic acid | C4H6O5 - PubChem

Tyrosinase is a multifunctional, glycosylated, and copper-containing oxidase, which catalyzes the first two steps in mammalian melanogenesis and is responsible for enzymatic browning reactions in damaged fruits during post-harvest handling and processing. Neither hyperpigmentation in human skin nor ...

An Updated Review of Tyrosinase Inhibitors

The Premier Supplier: Augustus Oils Ltd, in harmony with nature - to present it at its best... A wealth of experience, expertise and knowledge has allowed Augustus to bridge the gulf in expectation and trust between growers and users of natural ingredients.
