Mathematical Symbols - RAPID TABLES

The first mathematical symbols for arbitrary quantities appeared much later (from the 5th-4th centuries B.C.) in Greece. Arbitrary quantities (areas, volumes, angles) were represented by the lengths of lines and the product of two such quantities was represented by a rectangle with sides representing the respective factors.

Mathematical symbols - Encyclopedia of Mathematics

Unicode is a computing standard for the consistent encoding symbols. It was created in 1991. It's just a table, which shows glyphs position to encoding system. Encoding takes symbol from table, and tells font what should be painted. But computer can understand binary code only. So, encoding is used number 1 or 0 to represent characters.
