The Origin of AIDS and HIV May Not Be What You Have Learned. Most people believe that the origin of HIV, the AIDS virus, derives from some natural evolutionary event. Key among these HIV origin theories is the so called "cut hunter theory" in which a human, allegedly African native, received a bloody wound or infected splash while preparing a chimpanzee carrying a similar virus (i.e., SIVcpz).

In paleoanthropology, the recent African origin of modern humans, also called the "Out of Africa" theory (OOA), recent single-origin hypothesis (RSOH), replacement hypothesis, or recent African origin model (RAO), is the dominant model of the geographic origin and early migration of anatomically modern humans (*Homo sapiens*).. The model proposes a "single origin" of *Homo sapiens* in the ...

Other minority identifications of manna are that it was a kosher species of locust, or that it was the sap of certain succulent plants (such as those of the genus *Alhagi*, which have an appetite-suppressing effect).. Potential discrepancies. Some form critics posit conflicting descriptions of manna as derived from different lore, with the description in Numbers being from the Jewish tradition ...

A discussion main models on the spontaneous origin of life that aims to show how cellular complexity could have gradually emerged from simple systems - in contrast to the sudden appearance of complexity that creationists claim to have been necessary at the beginning of life. Central issues like the composition of the early atmosphere of the Earth and the origin of the homochirality of amino ...

There are 2 main species in the coffee world which are better or worse known, I dare to say, by the whole world. These are *Coffea canephora*, usually known as Robusta and *Coffea Arabica* or simply Arabica. The two types are mixed together to give the world what we know as coffee.

### **Coffee species: Arabica, Robusta, Liberica**

Here is a huge problem for origin-of-life scenarios: when amino acids are joined together, for example, a water molecule is released. This means that in the presence of water, the reaction is pushed in the wrong direction, backwards; that is, proteins will fall apart, not build, unless the water

is actively removed.

INTRODUCTION. Serratia species are gram-negative bacilli of the Enterobacteriaceae group of bacteria, although they are not a common component of healthy human fecal flora. In the early part of the 20 th century, Serratia marcescens was considered a nonpathogenic organism and was used in medical experiments and as a biological warfare test agent []. Since the mid-1970s, however, Serratia ...

The Origin of Philosophy: The Attributes of Mythic/ Mythopoeic Thought. The pioneering work on this subject was The Intellectual Adventure of Ancient Man, An Essay on Speculative Thought in the Ancient Near East by Henri Frankfort, H.A. Frankfort, John A. Wilson, Thorkild Jacobsen, and William A. Irwin (University of Chicago Press, 1946, 1977 -- also once issued by Penguin as Before Philosophy).

Atlantic salmon culture began in the 19 th century in the UK in freshwater as a means of stocking waters with parr in order to enhance wild returns for anglers. Sea cage culture was first used in the 1960s in Norway to raise Atlantic salmon to marketable size. The early successes in Norway prompted the development of salmon culture in Scotland, and latterly Ireland, the Faroe Islands, Canada ...

In China, turtles and tortoises have long been used for food and medicine, and their shells were once a critical part of divination (they would be heated and the cracks interpreted). For medicine, the top shell (carapace) or the bottom shell (plastron) is used, depending on the animal. In order to protect endangered species, their trade (import and export across national borders) is regulated ...
